The first part is correct, but the second part of this question is answered incorrectly (7 was mentioned instead of 5). Instead of judging from the graph, it would have been better to arrive at the correct answer if the values had been printed and verified, as multiple values were close.

## Question 3a

Scale rating criterion

### Given ratings

6 Aravind Satheesh

As the methodology used is correct, I gave it 6. But the correct number of trees is 16, not 15. The 2(b)(ii) error made this answer erroneous.

## Question 3d

Excellent way to represent the answer using gridlines which makes the visualization more readable.

## Question 4b

Scale rating criterion

### Given ratings

10 Aravind Satheesh
